- Salé, Morocco

### PROFESSIONAL SUMMARY:

Motivated Full-Stack Developer and AI enthusiast with practical experience building high-performance web applications and integrating modern AI tools. Specializing in the MERN stack, Next.js, AI prompt engineering, and creating scalable digital platforms. Eager to leverage a unique blend of technical skills, AI-assisted workflows, and creative problem-solving to build intuitive, user-centric platforms.

### SKILLS

- Front-End:** JavaScript, TypeScript, React, Next.js  
Tailwind CSS, Responsive UI Design
- Back-End & DB:** Node.js, Express.js, MongoDB, REST APIs
- Infrastructure & VCS:** Git, GitHub, GitLab, Vercel, Netlify
- AI & Tools:** Prompt Engineering, Gemini, AI Agents, Google Antigravity
- Languages:** English, French, Arabic

### SOFT SKILLS

- Problem Solving and Critical Thinking
- Time Management and Prioritization
- Communication and Collaboration
- Teamwork and Cooperation

### EDUCATION

- Dual-Mode Professional Training in Artificial Intelligence (2026)**  
Incubateur Digital Solidaire - Salé
- Full Stack Software Developer Professional Certificate**  
IBM (2023)
- Front-End Engineer Career Path**  
Codecademy (2022)
- Baccalaureate Degree in Economic Sciences (2021)**  
Lalla Aicha High School - Rabat

### EXPERIENCE

#### FULL STACK DEVELOPER INTERN

October 2025 – December 2025 – February 2026

DigitalSens | Rabat, Morocco

**Project Overview:** Designed and developed a comprehensive digital platform for GMED ([gmed.ma](#)), a specialized language center providing intensive medical German courses for healthcare professionals. The project required building an accessible, high-performance web application to showcase language programs, facilitate student registration, and manage medical career pathways in Germany.

- Phase 1: Project Scoping & Environment Setup (October 2025):** Mapped out the technical architecture and established the development environment for a full-stack application. Leveraged Google Antigravity and Gemini to rapidly generate boilerplate code, brainstorm structural layouts, and set up a clean, version-controlled repository to accelerate the initial build phase. Developed 3D renderings and visual presentations to communicate design concepts to clients.
- Phase 2: Front-End Execution & UI Optimization (December 2025):** Built a highly responsive, user-centric front-end interface utilizing React and Tailwind CSS. Utilized Google Antigravity and AI agents for advanced, prompt-driven component generation and rapid styling, ensuring an intuitive navigation experience for students browsing course details.
- Phase 3: Back-End Integration, Data Management, & Deployment (February 2026):** Engineered the backend server using Node.js and Express.js to seamlessly handle application logic and RESTful API requests. Integrated a MongoDB database to securely manage and store critical platform data, including dynamic class schedules and student registrations. Conducted AI-assisted code audits before managing the final deployment and hosting of the live platform via cPanel.

### PERSONAL PROJECTS

#### Dar Tazart ([dartazart.com](#)) E-Commerce Platform | Full-Stack Developer

- Engineered a premium, high-performance web application utilizing Next.js (App Router), React, TypeScript, and Tailwind CSS.
- Architected a "Smart Shop Engine" with Prisma ORM for server-side data fetching, dynamic category generation, and custom inventory sorting algorithms.
- Managed global state using React Context API to build a localized shopping cart, seamless product variant switching, and full multi-language translation (English, French, Arabic).
- Configured the CI/CD pipeline and deployment infrastructure via Vercel, enforcing strict type safety and actively debugging build environment conflicts to ensure flawless production releases.
